Ayush Kumar **|** VyasAyushKumar **|**

New Delhi, Delhi - 110041

OBJECTIVE

Seeking an entry-level position as a web developer to leverage my skills in HTML, CSS, and JavaScript. Aiming to contribute to innovative web development projects, combining my passion for front-end design and user experience with practical problem-solving in areas such as responsive design, dynamic websites, and modern web technologies.

EDUCATION

- **IGNOU(Indra Gandhi National Open University)** — *Pursuing*
  Bachelor of Computer Application — New Delhi
- **GSBV, Nihal Vihar** — *2024*
  Senior Secondary (XII), Humanities from CBSE Board — New Delhi
- **GSBV, Nihal Vihar** — *2022*
  Secondary (X) from CBSE Board — New Delhi

EXPERIENCE

- **IT Bloatware Solutions** — *May 2024 - Aug 2024*
  Web Designer Intern — Nangloi, New Delhi
  ◦ I used to work on the Html, CSS. I managed the performance of website. And I also worked for the Responsive Design. Sometimes I code in JavaScript for some specific feature or task.

PROJECTS

- **Project A: [Sundow Studio, Frontend Web page clone]**
  Tools: [Html, Css, JavaScript, and Gsap]
  ◦ This clone includes a product type based website design where I add Dom in this project for more interactivity and this clone is suitable for both desktop and phone.

- **Project B: [Two Good Co, Frontend Web page clone]**
  Tools: [Html, Css, JavaScript, and Gsap, Scrolltrigger]
  ◦ This is a brand based website where I added my Locomotive, Scrolltrigger knowledge in this project it is well responsive design as well.

- **Project C: [Refokus, Frontend Web page clone]**
  Tools: [Html, Tailwind Css, React.js, and Framer Motion]
  ◦ Refokus is one of my best project because in this project I got to learn new libraries with different types of animation, I put my tailwing knowledge in this project as well and each react component of this website took industry level functionalities.

- **Project D: [Docs Mini , Frontend Web page clone]**
  Tools: [Html, Tailwind Css, React.js, and Framer Motion]
  ◦ This is one page document locker project where the client can store his data and download the file of the data. It is frontend based project is includes animation(framermotion) and concepts(react.js)only
